

He's making a list, he's checking it twice

... but is the boss including everything that's required in the risk assessment?

☞ We know ventilation is one of the most important measures for limiting the spread of Covid aerosols, and yet union safety reps have told us it's one of the controls least likely to have made it onto a risk assessment.

Today we've published [fresh advice](#) on what unions can do to make work safe using air monitoring, cleaning and ventilation. [Read our advice on ventilation.](#)

Help more people see our advice by sharing to [Twitter](#) or [Facebook](#).

❄ Working through the cold? As the temperature drops, see our [advice](#) on working in extreme temperatures.

P.S. are you in our TUC Health & Safety Alerts group on whatsapp? [Click here to join](#) and get the latest updates and advice straight to your phone.

P.P.S. Need a last-minute Christmas gift idea? A [subscription to Hazards Magazine](#) is a great way to show you care about a loved ones' welfare!

All the best, and here's to a safer, healthier 2022.

Shelly Asquith
TUC Health and Safety Policy Officer
