

**EDINBURGH**

**END FUEL POVERTY**

**COALITION**

In the latest attack on working class cost of living, we are now being informed that fuel price caps will rise to over £5,000 per annum early next year. This will see around 70% of families in Scotland slide into extreme fuel poverty (defined as spending more than 20% of household income on gas and electricity bills).

We can't sit back and accept this. Join us in calling for:

- An immediate freeze on energy bills and ensure no household pays more than 10% of their income on energy
- Equalise the costs of unregulated fuels
- End the use of pre-payment cards which carry the most expensive tariffs
- Increase investment in home insulation and retrofitting
- Accelerate diversification from fossil fuels
- Bring all energy industries into public ownership
